

Technical Rider

This Rider is part of the contract between me.man.machine (Artist) and the local promoter. Changes in the technical specifications only after previous agreement with the artists management or technical crew.

General

Please provide a well balanced PA system in perfect working order, powerfull and with enough low end, flown wherever possible. The system must be installed and tested by the time we arrive. We also require full access and use to the amplifiers and controllers (x-overs) for our adjustments. The F.O.H. desk should be positioned in the center of the room, not against the back wall or under a balcony. Distance at about 2/3 of the overall length of the concert hall. Please provide one accustomed house technician and a lighting technician.

FOH

Mixing console with min. 32 channels, 4 times parametric, 8 auxes
2 channel 31-band grafic equalizer
8 compressors / 6 gates
We bring my own effect rack
Makes me happy: Digico SD8, Soundcraft Vi6, Avid Venue
Makes me unhappy: LS9

Monitors

me.man.machine play with IEM that we provide, do wedges needed! Monitordesk is nice, then we need a good monitor engineer, monitors from F.O.H. is fine with us too.

Band engineer

Andrew Phillips
